HIGH MASTS

KARTIO

The KARTIO mast shares the same shape as Pallas, Tehomet's most popular wooden pole

The Kartio wooden mast is an ideal solution for illuminating public squares and expansive outdoor areas that require powerful, large-scale lighting.Each Kartio mast is individually designed by Tehomet to suit the specific needs of the project, ensuring the best possible fit for both functionality and aesthetics.

In addition to luminaire mounts, the Kartio mast can be enhanced with decorative elements, such as mast-top spikes, which add elegance and a distinctive character to the structure. These decorative spikes can also be illuminated to create an even more sophisticated visual effect.

For projects requiring broader light distribution, a double-shaft version of the Kartio mast is also available.

PEFC-certified Finnish wood – responsibly sourced from sustainably managed forests.
