HIGH MASTS
NELIÖ

Elegant Wooden Mast for Large Outdoor Spaces

Named after its Finnish namesake, the Neliö wooden mast is a popular lighting solution known for its clean, elegant, and conical form. It is ideally suited for illuminating public squares, parks, and other expansive outdoor environments.

Neliö combines style with sustainability, offering a refined lighting option that is both functional and visually striking.

Designed to meet the unique specifications of each project—just like our Koli square conical pole—Neliö can also be customized with decorative elements, such as mast-top spikes, to further enhance its sophisticated appearance.

For projects requiring wider illumination, we also offer double-shaft versions of the Neliö mast.

PEFC
PEFC/02-31-141

PEFC-certified Finnish wood – responsibly sourced from sustainably managed forests.
